PROFESSIONAL SUMMARY

PMP-certified Strategic Workforce Management leader with **15+ years of experience** leading workforce strategy, capacity planning, forecasting, financial planning, operational readiness, and workforce transformation across global technology and financial-services environments. Proven ability to translate demand, cost, service-level, and operational risk into executive decisions while establishing scalable governance and standardized planning frameworks. Experienced leading distributed WFM teams, BPO strategies, enterprise platform implementations, and AI-informed forecasting across complex multi-region operations.

AREAS OF EXPERTISE

Technical Skills: Footprint Strategy | Global Capacity Planning | **Forecasting & Scenario Modeling (Erlang C) | Staffing, Real-Time Management & Scheduling | Backlog Management | Operational Readiness | SLA & Performance Management | Headcount Governance | Financial Planning & Cost Optimization | Risk Planning | Root Cause Analysis | Reporting & Analytics Governance (WBRs / MBRs / QBRs)**

Tools/Technologies: NICE (IEX) | Capability | Verint | Genesys | Avaya | Zendesk | Salesforce | Power BI | Tableau | SQL (Working Knowledge) | Advanced Excel | Asana | Jira | Smartsheet | Microsoft 365 | Google Workspace | ChatGPT | Gemini | Claude

Program Leadership & Core Competencies: Executive Governance & Data-Driven Decision Support | Stakeholder Management | Cross-Functional Leadership | Team Leadership | **Project Management | New Business Launch Support | WFM Tool Launches | Change Management | Process Standardization | SOP & RACI Creation** | Vendor Management

PROFESSIONAL EXPERIENCE

Senior Manager, Workforce Management - US&C & LATAM | Uber **Chicago, IL | 03/2025 - Present**

*Lead workforce strategy, financial planning, capacity governance, operational readiness, **program execution, and customer support launch planning** across US&C and LATAM Community Operations, supporting complex global workflows and multi-million-dollar resource allocation decisions.*

- Established a 300-seat Crash & Claims support operation across Phoenix and Chicago by developing contact-volume projections, handle-time assumptions, channel requirements, and headcount models supporting phone and messaging operations.
- Drive 2026 and 2027 workforce financial planning and budgeting in partnership with Finance and Operations, translating volume, productivity, and shrinkage trends into annual workforce budgets and monthly staffing requirements.
- Optimize multi-million-dollar workforce allocations through dynamic staffing models, automated forecasting, and Erlang-based capacity analysis that surface demand, capacity, cost, and service-level tradeoffs for leadership.
- Established WFM SOPs and executive governance mechanisms aligning Operations, Finance, CX, and Enablement around workforce priorities, financial targets, staffing actions, and operational risk.
- **Led enterprise WFM platform launch and implementation activities to establish a centralized source of truth for headcount governance, workforce planning, and operational capacity analysis.**
- Lead and mentor 5 WFM team members across distributed regions, strengthening accountability, planning discipline, stakeholder engagement, and execution consistency.

Manager, Workforce Management - Capacity Planning & Scheduling | Uber **Phoenix, AZ | 07/2022 - 02/2025**

Owned capacity planning and scheduling strategy across US&C operations before expanding responsibilities into LATAM, standardizing workforce methodologies, governance, and stakeholder engagement across multiple locations.

- Established a standardized capacity-planning and scheduling framework across 45 US & Canada lines of business in Phoenix and Chicago, then expanded common formulas and learning-curve assumptions into LATAM and broader global WFM practices.
- Strengthened workforce decision-making across Phoenix, Chicago, Costa Rica, and Brazil by establishing stakeholder governance, defined meeting cadences, standardized reporting, and monthly reviews with senior site leadership.
- Clarified end-to-end accountability across real-time management, scheduling, capacity planning, and forecasting by partnering with WFM leaders, functional teams, and Enablement to establish RACIs, SOPs, and functional growth strategies.

- Modernized capacity-planning infrastructure by integrating volume analytics with Erlang C modeling, improving alignment between staffing requirements and changing customer demand.
- Improved workforce positioning against peak demand by coordinating scheduling, Talent Acquisition, and workforce planning while managing overtime exposure.
- Built real-time shrinkage and predictive-demand models supporting intraday workforce allocation and driver-supply planning.
- Managed and developed 4 WFM capacity planners and schedulers across distributed centers of excellence.

Manager, Workforce Management - Uber Outsourced Business, LATAM | Uber **India | 10/2019 - 06/2022**

*Led workforce strategy and BPO planning across LATAM outsourced operations, with accountability for staffing, vendor coordination, capacity planning, performance governance, **business launch support**, backlog management, and workforce cost controls.*

- Standardized staffing, performance, backlog, and headcount-monitoring processes across BPO operations in Brazil and Costa Rica, improving leadership visibility into workforce gaps, vendor performance, capacity, cost, and service quality.
- Strengthened BPO delivery strategy by partnering with Vendor Management to align external operations with internal performance metrics, SLAs, capacity requirements, financial expectations, and quality requirements.
- Improved financial oversight of outsourced operations by partnering with Billing and Strategy teams to reset planning assumptions, clarify BPO billing methods, and establish consistent controls for dry-queue costing and overtime approvals.
- Developed multi-year capacity roadmaps supporting business launches, seasonal demand, and organizational expansion while partnering with Finance, Operations, Vendor Management, and Analytics on capacity tradeoffs and operational safeguards.

WFM Business Analyst - Financial Services & Compliance Operations | American Express **India | 12/2017 - 10/2019**

Led workforce forecasting and capacity planning within a regulated financial-services environment, translating merchant activity, product launches, demand changes, and business growth into staffing and budget requirements.

- Supported the successful launch and onboarding of approximately 2,500 merchants across APAC and ANZ by translating product launches and merchant onboarding/offboarding activity into volume forecasts, handle-time assumptions, capacity plans, and workforce requirements.
- Enabled financial planning and budgeting by converting customer retention, market outlooks, merchant growth, and operational demand into staffing projections and workforce forecasts.
- Strengthened coverage and operational safeguards through intraday staffing governance, shift-rotation optimization, hybrid planning frameworks, and variance root-cause analysis.
- Earned a peer-recognition award from the project leader for productivity, commitment, and maintaining a positive team environment.

SELECTED STRATEGIC IMPACT

- **Platform Transformation & Headcount Optimization:** Contributed to a unified CRM and global capacity-planning platform transformation with Data Engineering that standardized data pipelines across sites and supported a **12% headcount reduction**.
- **Cost Optimization & Workforce Governance:** Delivered a **22% annual reduction in operational expenditure** by harmonizing shrinkage frameworks, holiday calendars, and PTO structures across international operations.
- **Operating Model Transformation:** Increased workforce flexibility by consolidating fragmented Operational Units, reducing resource ringfencing and enabling a more agile cross-functional operating model.
- **Launch Readiness & Capacity Strategy:** Architected WFM planning for specialized **Crash & Claims and Autonomous Vehicles** launches, establishing predictive capacity and scheduling approaches supporting scalable operations and SLA performance.

EARLY CAREER EXPERIENCE

Analyst - Capacity Planning, Scheduling & Real-Time Management | Convergys **India | 03/2011 - 12/2017**

Managed real-time workforce operations, queue distribution, schedule adherence, capacity reporting, and service-level performance across global customer-support teams, consistently achieving target SLAs.

EDUCATION

Diploma in Business Administration | ICFAI **Hyderabad, India**
Bachelor's in Humanities | Delhi University **Delhi, India**

CERTIFICATIONS

Project Management Professional (PMP®) | Project Management Institute
Project Management 360 Certification | Cornell University
